Luminaires needing assembly by the user	Common sense - Easiness of connection - Pendant luminaires	ETF5	2023 CTL Plenary Meeting
<b>Question</b>			
This decision addressed pendant luminaires with glass shades needing assembly by the user. The manufacturer wanted to transport the luminaires in parts to protect against breakage. It was noted that there is not always a clear distinction between industrial and domestic luminaires.			
<b>Decision</b>			
The luminaires can only be regarded as a complete unit with all internal wiring in place. However, if needed for industrial luminaires, the luminaire can be supplied in more than one piece". Common sense must be applied having regard to the type of luminaire and the ease of connection.			
<b>Explanatory notes</b>			
This decision updates the old decision sheet DSH0819(2010) to be in line with NEW standard editions.
