| LITE | | | |
| Subject | Keywords | Developed by | To be approved |
| Lighting chain | <ul style="list-style-type: none"> - Pulling test - Conductors Class II / III | ETF5 | 2023 CTL Plenary Meeting |
| Question | | | |
| In the § 20.11.3, it is stated that the cable is subjected 25 times to a pull of 30 N. Is this test applicable to the class III lighting chains? | | | |
| Decision | | | |
| The standard does not make any differentiation between class II or class III lighting chains. The pull test should be applied even to the class III lighting chain | | | |
| Explanatory notes | | | |
| This decision updates the old decision sheet DSH0963(2010) DSH 963A(2019)and DSH 963B(OSM LUM) to be in line with NEW standard editions. | | | |
